

## Process & Decision Documentation

### Side Quest #1 Decisions

Initially, I was having difficulties “linking” my files together so that when I publish the repository to GitHub, it would not show at all. To fix the issue I moved the location of my files directly onto my desktop. I think it is due to putting it in the “Documents” file that it caused the local files to not work.

### *GenAI Documentation*

No documentation was used in this assignment.
